15+ years experience | **AI-first** Copilot + MCP | **5–6** engineers led | **Team** mentor, collaborator

PROFESSIONAL SUMMARY

Senior full stack engineer with 15+ years delivering secure, scalable platforms across banking, insurance and healthcare in New Zealand and Singapore. Currently building KiwiSaver and wealth APIs for the BNZ mobile app. Deep expertise in Java and Spring Boot microservices, Kubernetes and OpenShift delivery, Kafka event streaming and CI/CD. Works AI-first in daily delivery with GitHub Copilot, MCP skills and the BNZ AI Hub, and is a collaborative, team-oriented engineer who mentors others and leads releases end to end.

CORE SKILLS

BACKEND	Java, Spring Boot, Spring Batch, Node.js, Express, Microservices, REST APIs, Kafka, Redis, JPA/Hibernate
FRONTEND	React, TypeScript, Angular, JavaScript, Redux
CLOUD & DEVOPS	AWS (EKS, Lambda, DynamoDB, SQS, EC2), Azure (AD B2C, Blob Storage, DevOps), Docker, Kubernetes, Helm, OpenShift, ArgoCD, Jenkins, Spinnaker, Kong, 3Scale, LaunchDarkly (feature flags), CI/CD
DATA & OBSERVABILITY	Oracle, PostgreSQL, MySQL, MongoDB, DB2, Splunk, ELK, Prometheus, Grafana, Dynatrace
QUALITY & SECURITY	JUnit, Mockito, Wiremock, Jest, Selenium, JMeter, SonarQube, Nexus, vulnerability remediation, security scanning
WAYS OF WORKING	AI-assisted development (GitHub Copilot, MCP skills, BNZ AI Hub), Agile, Scrumban, DevSecOps, pair programming, Jira
STRENGTHS	Team-oriented, mentoring and coaching, ownership of delivery, clear communication, adaptable

PROFESSIONAL EXPERIENCE

Senior Developer

BNZ, Queen Street, Auckland | **Aug 2026 – Present**

- Delivered KiwiSaver wealth domain APIs for the BNZ mobile app using Java and Spring Boot microservices.
- Integrated the external FirstScape Apex vendor API, owning financial data extraction and mapping.
- Migrating the statements service from MuleSoft to Spring Boot while supporting legacy MuleSoft services.
- Own fortnightly Documents API releases: container image updates, Nexus vulnerability fixes and security scans.
- Deploy and operate services on Kubernetes (AWS EKS) and OpenShift via Jenkins and Spinnaker pipelines, behind Kong gateway with Redis and Kafka, using Splunk for logging and troubleshooting.
- Apply AI-assisted engineering with GitHub Copilot, BNZ MCP skills and the BNZ AI Hub to speed up delivery and quality.
- Use LaunchDarkly feature flags for controlled feature rollouts; work in a Scrumban team using Jira and take part in on-call and production support for the domain.

Senior Full Stack Developer

Southern Cross Health Insurance, Auckland CBD | **Dec 2023 – Aug 2026**

- Built and deployed Node.js microservices on Red Hat OpenShift, integrated with 3Scale API Gateway and ArgoCD for secure GitOps delivery.
- Developed an Angular login portal with Azure AD B2C, improving authentication experience and security.
- Migrated legacy .NET Core API business logic to Node.js microservices, refactoring endpoints for scalability and maintainability.
- Designed atomic and composite microservices to migrate documents from Documentum to Azure Blob Storage and InfoArchive.
- Established UAT and test environments with Azure Pipelines CI/CD, enabling automated and load testing for release quality.
- Maintained ELK, Firebase, MySQL, Oracle, BrowserStack and Docker tooling; mentored junior engineers through code reviews and pairing.

Full Stack Developer (AVP)

OCBC Bank, Singapore | **Jul 2022 – Nov 2023**

- Led end-to-end migration of a legacy trading application to Java, Spring Boot, React and OpenShift with minimal downtime.
- Built RESTful Spring Boot APIs and a React/TypeScript UI, improving transaction responsiveness.
- Integrated Kafka and ELK to streamline data flow and monitoring.
- Implemented CI/CD with Jenkins and CloudBees Flow, achieving 94% test coverage through SonarQube quality gates.
- Authored Kubernetes and Helm manifests for blue-green, self-healing deployments.
- Led the Bonds product go-live and Funds Trade Phase 2 OpenShift migration; introduced Agile and DevOps practices and resolved DevSecOps findings.

Software Development Engineer

Prudential, Singapore | **Jan 2017 – Jul 2022**

- Developed Java, React and Azure microservices and front end for the primary point-of-sale application.
- Delivered a high-performance SQS Engine API to streamline message processing and reduce latency.
- Implemented Dynatrace monitoring and led migration to Prometheus and Grafana for richer metrics and alerting.
- Optimised downstream data flow with Spring Batch and Unix scripts, improving job efficiency by about 25%.
- Cut response time of critical SQL queries by 30%, improving Spring Batch performance.
- Built Node.js microservices (2017–2019) and full-stack Java, Spring Boot and AngularJS solutions on AWS (Lambda, DynamoDB, SQS, EC2).
- Led a team of five to six engineers, managed infrastructure releases, mentored new hires and introduced pair programming.

Senior Developer

IBM, Singapore | **Dec 2014 – Dec 2016**

- Built and maintained outpatient applications for nine government-run national polyclinics in Singapore, a system generating millions in monthly revenue.

EARLIER CAREER

Sr. Software Engineer | Nucleus Software (UOB Bank), Singapore | **Aug 2011 – Nov 2014**
Led development of a credit and loan origination system for a major Singapore bank, including expansion to 19 countries.

Software Engineer | ACI Worldwide, Bangalore | **Apr 2007 – Aug 2011**
Built banking product features and user interfaces for a US-based product development company.

EDUCATION

Master of Business Administration
Murdoch University, Perth (via Kaplan Higher Education Institute, Singapore) | 2020 – 2021

Bachelor of Technology, Electronics and Communication Engineering
Sikkim Manipal Institute of Technology, India | 2001 – 2005

Accelerated ANIIT, Software Engineering
NIIT Academy, Bangalore | 2006 – 2007

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (2022)
- ITIL V4 Foundation (2021)
- Pulse Artificial Intelligence Certificate, Levels 1 and 2 (2021)

AWARDS

- OCBC Spot On Award (2022): speedy initiation of React development for the EdgeConnect migration.
- Prudential "Empathetic" Title (2022): dedication and support for project deliverables.
- Prudential Spot Award (2021): helping resolve mission-critical issues for other teams.
